**DETAILED ACTION**

This application has been examined. The claims 1-60 are allowed.

***Allowable Subject Matter***

1. The following is an examiner's statement of reasons for allowance: The present invention is directed to a liquid crystal display having on an insulating substrate a plurality of source signal lines, a plurality of gate signal lines, a plurality of pixels, and a source signal line driver circuit for driving the source signal lines, wherein the source signal line driver circuit has a plurality of analog buffer circuits, wherein a switching circuit having switches is provided between the analog buffer circuits and the source signal lines, wherein the plurality of source signal lines and the plurality of analog buffer circuits constitute a circuit group. The closest prior art of Chiang ((2002/0063674) shows a similar invention, however, he fails to teach wherein a connection between one of the source signal lines and one of the analog buffer circuits is periodically switched to a connection between the one of the source signal lines and another one of the analog buffer circuits by any one the switches as claims 1-4, 25-28; or wherein a switching circuit is provided between the analog buffer circuits and the source signal lines, wherein n (n is a natural number and is equal to or larger than 2) source signal lines and n analog buffer circuits constitute a circuit group, wherein a set of n periods is periodically repeated, and wherein, in an r-th period, the switching circuit connects an m-th source signal line in the circuit group to an (m+r-1)-th analog buffer circuit and an 1-th source signal line to an (1-n+r-1)-th analog buffer circuit, respectively as claims 5-6, 29-30.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
